The Laundry Alternative, Inc.

The Laundry Alternative is committed to providing you with innovative, cost-saving, environmentally friendly products that work. Our flagship product is the Wonderwash, a \$42.95 pressure washing machine that uses 90% less detergent and water than conventional models. These washing machines are ideal for campers, RV owners, frugal people, singles, seniors, college students, apartment dwellers and many others. To find out what other people are saying about the Wonderwash, [click here](#).

- Only \$42.95!
- Uses 90% less detergent & water than conventional washing machines
- Does not require electricity
- Washes loads clean in only 1-2 minutes
- Highly rated by *Cruising World Magazine*, *Practical Sailor* and other independent sources

Did you know that lint from washing machines is a leading cause of expensive septic system failure? Our Septic Protector™ is the only product which can eliminate this problem, and has been featured on CNN, ABC, CBS, NBC, PBS, and FOX.

We also carry the the only washing machine hoses that offer true protection against burst hoses. Contrary to popular perception, stainless steel hoses are not effective. Washing machine hose failures are no small matter: according to State Farm, they cause \$170 million in damage each year in the US & Canada. We also carry an automatic shutoff valve, which turns off the valves for you after each wash cycle.

Other products include a portable mini-dryer that dries clothes as quickly as a conventional clothes dryer for only \$19.95, a compact automatic washer-dryer for only \$299.95, (on sale right now-new models are available for only \$97! This is not a misprint!) an eco-friendly alternative to dryer sheets and much more.
